College of Engineering

Proposed Study Plan For Graduation

The College of Engineering expects students to graduate within 4 years and without undertaking more than 215 units. Those who find that they will need to exceed these limits are expected to propose a study plan for graduation for the fastest reasonable progress in fulfilling degree requirements.

TO THE STUDENT: Please answer questions 1-4 below to describe your needs (use a separate sheet if necessary). Then, on the reverse side complete the chart to indicate how you will fulfill your remaining degree requirements and other educational goals. Before submitting your proposal, you must have it endorsed by the advisor for each major and minor you intend to complete. Allow several days for your department advisor(s) to review your proposal.

1. List the major(s) and minor(s) you plan to complete.

2. Describe additional educational or professional objectives that you are pursuing through further study.

3. Briefly explain why you will need to stay beyond 4 years and/or to complete more than 215 units before attaining your degree. Please indicate how many of your units come from Advanced Placement credit.

4. Describe any extenuating circumstances that might influence the dean’s decision.

5. Run a degree audit in GOLD to confirm your remaining requirements and then complete the Study Plan for Graduation on the reverse page making sure to account for satisfaction of all degree requirements, including the following:
   - Units (both overall and upper-division)
   - General Education
   - UC Entry Level Writing Requirement
   - American History and Institutions
   - Scholarship: minimum 2.0 UC GPA overall, in your total major, and in your upper-division major
   - Academic residence:
     » 3 regular terms in the University of California
     » 35 units at UCSB in senior standing
     » 27 upper-division units at UCSB, including at least 20 toward your upper-division major
   - Major requirements and minor requirements if you hope to complete a minor

Complete your study plan by listing the courses you propose to complete, their unit value, and the requirements they are fulfilling. Using MA for major, MI for minor, GE for general education. Many departments post proposed courses by quarter lists on their web pages to assist you. As well, there is a Course Enrollment History link in GOLD that provides you access to records of when courses have been previously taught.

### Department Advisors: Please evaluate the student’s plan, sign this document, and indicate how you would describe the plan on the basis of the four choices listed below. Multiple selections may be appropriate.  

1. The student has already fully satisfied requirements for the major or minor.  
2. The student has not yet fulfilled all requirements for the major or minor, and the plan submitted is the most efficient approach to fulfillment.  
3. While the student’s plan accounts for fulfillment of all major or minor requirements, s/he could reasonably complete them more quickly. Please elaborate in comments section if you choose this #.  
4. The student’s grade-point average in pertinent courses is currently unsatisfactory. Please elaborate in comments section if you choose this #.
